7" AHD 1080P QUAD DISPLAY MONITOR

Model Number – M710-Q

Short Description

Why are Hidden Camera Surveillance *Truck, Bus & Trailer Reversing Cameras* different from others? Compare our HD LCD monitors and *AHD mobile cameras* and see for yourself. AHD (*Analogue High Definition*) are the best. If you require high visual clarity, there's no point buying low resolution cheap monitors or cameras. To truly appreciate visual HD quality, AHD monitors demand equivalent high resolution AHD cameras. Our *vehicle monitors* and *cameras* are all AHD 1200 TV Lines or double the clarity of most others.

Description

Ideal for *cars, buses, trucks, forklifts, agricultural vehicles, heavy machinery, tractors, trailers, caravans, semi-trailers, horse floats* and so much more.

7" LCD Quad View Monitor as supplied by Hidden Camera Surveillance, offers a wide range of *vehicle monitors and car cameras (including wireless)* in various shapes and sizes but always maintaining that AHD quality. This *Quad View AHD Monitor* will display 1, 2 or 4 cameras simultaneously. Also available in a wireless version with optional recording. Please note if using your own cameras, beware of compatibility as not all AHD monitors support non AHD cameras.

Reverse Parking Guidelines

Another feature standard in our monitor range are parking guidelines. Most are familiar with *car reversing cameras* and the more advanced show parking or reversing guidelines to assist with driver parking. Our *AHD vehicle monitors* support this feature too but it's not an added extra, it's standard.

Why are vehicle monitors different quality?

Our monitors are Ultra-High definition 1024 x 600 (not lower resolution 600 x 480 pixels) and there is a significant difference between the two. The same applies to our cameras. Most other analogue mobile cameras are IP69 and just 600 TV Lines whereas our cameras are a much higher grade IP69K rating and an amazing 1200TVL. Does that make a difference? You bet it does.

How many cameras does this 7" AHD Monitor Support?

This monitor supports 4 cameras, although each camera can be displayed full screen or in various split views. This is not a dual split screen monitor (split screen optional) although the monitor has a manual switch allowing drivers to instantly change camera view and preference.

Warranty

Sure, no problem we offer 2 years camera replacement warranty, express postage excluded. We are an Australian registered ABN company since 1982 not some fly by night business.

Are vehicle monitors easy to install?

Please note we don't install. Our *Monitors* have voltage overload and reverse polarity protection to ensure hardware isn't damaged by fitting mistakes. The monitors support a wide voltage range from 9V-36V which in most cases covers just about all trucks and vehicles.

Other than mounting a few brackets its very much straight forward although you do need to connect the monitor to vehicle power, perhaps at the fuse box. If DIY confident that's fine otherwise any local auto electrician will have it completed in next to no time with quality assurance. We always recommend using the services of an expert auto electrician.

How are cameras connected to a monitor?

Assuming we are talking about cabled cameras rather than wireless, Hidden Camera Surveillance provides DIN cables in various 5,10,15 & 20M lengths as pictured below.

4-Pin Cable

Special thick hard wire can shield vehicle's circuit interference better than normal AV cable.

Waterproof camera

Excellent picture in our camera, over-ecpectation in your mind.

Specifications

Supports wide voltage 9V-36V

Semi tilting camera mounting bracket
