WIFI WIRELESS FAST PHONE CHARGER & CLOCK 4K HIDDEN CAMERA

Model Number – WF-CHARGER-4K

Short Description

Our new WiFi wireless phone charger hidden camera is just amazing. The free phone App which supports IOS & Android is packed full of features and easy to use. If you have WiFi at the camera location, great you can view it live from your phone anywhere in the world, even 4G.

However, even if you don't have WiFi, you can still use the *spy camera* locally and view it on your phone, provided you're within a certain range of the camera. If connected to WiFi, then distance isn't a factor.

Description

Place this *4K spy camera* anywhere in your house, plug it into a 240 power point (12V power supply included with an Australian connection) and it works. It will record audio and video continuously or set motion detection recording. It not only disguises itself as a smartphone wireless charging station but functions as a wireless charger. Just place your mobile phone horizontally in the cradle and charge it.

This *clock docking station camera* supports a WIFI connection. Pair this *home security camera* with your WiFi router and start watching videos LIVE on your mobile phone or remotely. Receive alert push notifications once it detects any intruders or people entering your home. If looking at the camera live, don't forget you can also record directly to your phone but otherwise it will record to the internal memory card if selected.

Plug this fantastic *hidden home security camera* into any Australian power point to view the camera live and playback recordings from anywhere in the world. Packed full of features including an optional concealed micro SD card up to 128GB.

We stock a huge range of [WiFi Spy Cameras](#) & [DVR Hidden Cameras](#). If WiFi is not of particular interest to you but you like the idea of a phone charger hidden camera, please note we have similar devices that are DVR (Digital Video Recorders) but without the WiFi. Cheaper and perhaps easier to use. Call if you need more information.

This Wireless Docking Station 1080P to 4K WiFi Spy Camera like nothing else. Resolution and recording quality can be remotely adjusted for longer recording capacity. The phone charger camera supports up to 128GB Class 10 (optional) micro SD card. If you have any concerns about introducing something new into a home or office, what could be better?

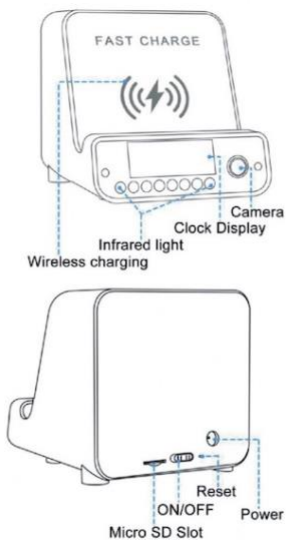

This *4K Spy Camera Docking Station* is a fully functional wireless mobile phone charger and a time clock with blue LED as pictured. When connected to your phone or WiFi, the clock time enabled automatically meaning no need to physically adjust anything. No Glow IR for night vision is all included so no matter the lighting conditions, this spy camera can see in any environment.

Should you require the charger to wirelessly charge your compatible mobile phone, simply place your phone horizontally into the charging cradle. Before long it's all charged with no need for any wired connection. Please note this device is not battery powered, it's 12V powered.

Contents

Wireless Docking Station Camera
USB Cable
DC 5V Power Adapter

Can this Wireless Charging Docking Station Spy Camera record in total darkness?

You better believe it! The built in NO GLOW Infra-Red is high quality and invisible. It can record in HD quality in total darkness up 5m or more away. The audio rerecording is very good as well.

Tell me more

Ideally suited to homes, offices, warehouses, sheds etc you name it. As a matter of interest this fantastic *Wireless Charging WiFi Docking Station* has a very covert pinhole megapixel lens built in. To the naked eye no one but no one will find it. After all, this is a real fully functional *Docking Station* so to any prying eye, it's extremely unlikely that it would be found. You know it's a *Docking Station Spy Camera* but no one else will.

Can I be alerted if the camera senses motion?

Reasonable question to ask and yes of course you can. Using the free mobile phone App, the authorised user is able to simply switch PUSH ALERTS on/off. When activated, each time the camera detects motion, not only will it record to the

secure and concealed micro SD memory card, but you will also receive a short motion ALERT on your mobile phone (different from a text)

What happens when the SD memory card is full?

Once again, it's just a matter of App function selection. There are basically two SD card options from which to choose.

- 1 Stop recording when the SD card is full
- 2 Loop or Recycle Recording (select Loop Recording)
